<JOURNAL TITLE>
<MANUSCRIPT TITLE>

Dear editor,

Thank you for your useful comments and suggestions on the language and the structure of our manuscript. We have modified the manuscript accordingly, and the detailed corrections are listed below point by point:

1) In its current state, the level of English throughout your manuscript does not meet the journal's required standard. Authors have the responsibility to present their papers in good English which can be understood by the journal's readership.

✓ We revised the WHOLE manuscript carefully to avoid language errors. In addition, we asked several colleagues who are skilled authors to check the English. We believe that the language is now acceptable for the review process.

2) Please note that your abstract (250 words) exceeds the maximum length of 150 words for research article.

✓ The abstract has been revised and the word count is now 149.

3) Figures should be cited sequentially in the text. Fig. 6 is provided, but not cited; please check and revise accordingly.

✓ Now all figures are provided and cited sequentially in the text.

4) The cover letter provided should include the following: the manuscript has not been previously published, is not currently submitted for review to any other journal, and will not be submitted elsewhere before one decision is made.

✓ The required information has been included in the cover letter.

5) Type the whole manuscript with uniform lettering and sizing, and with double line spacing, including references, figure captions and tables.

✓ We have typed the whole manuscript in uniform lettering and sizing, and with double line spacing.

6) Please note that the reference list must conform strictly to the Guide for Authors. Journal names should be abbreviated and page span should be provided.

✓ We have checked all the references and formatted them strictly according to the Guide for Authors. Especially the journal names have been abbreviated and page span provided.

The manuscript has been resubmitted to your journal. We look forward to your positive response.
