

List of Reviewers 2009

The standard of a scientific journal is to a great extent dependent on the quality of its reviewers. The again increased impact factor of the journal is thus also thanks to all reviewers, all those scientists that volunteer to contribute to improving the quality of our interdisciplinary field by guiding the authors in their efforts to communicate their results. The *Journal of Ethnopharmacology* would like to thank the following reviewers for their important contribution to the quality of the journal in 2009:
